

Greater Depth in Primary Geography

Are you looking for simple but effective strategies to support children's development as Geographers?

We are working with TT Education to offer this engaging, practical series of two twilights, which will inspire you to develop your pupils' love of Geography.

Greater Depth in Primary Geography examines this key Foundation subject in the context of Ofsted's new framework, demonstrating how to support all children to develop skills, knowledge, curiosity and a depth of understanding. You will experience games and practical approaches to help raise standards in Geography in an engaging, workable and enjoyable way.

This training will help you:

- Unpick the concept of 'Greater Depth' in Geography.
- Understand how Geography can inform other curriculum areas without lowering standards in this key Foundation subject.
- Discover a range of proven strategies that can engage children in Geography, empowering them to ask and answer complex Geographical questions.
